IN REFINISH TECHNOLOGY

Martin Senour® Complete Color Surfacer / Sealer System
With **“Pre-Flexed”** Technology

FEATURES
ADVANTAGES
BENEFITS

Features	Advantages	Benefits
“Pre-Flexed” Technology - The Latest in Resin Technology from Martin Senour Research and Development	“Pre-Flexed” resin system eliminates the need for additional flex additives and mixing steps	“It’s in there”! Insures the ultimate in flexibility and durability while lowering material costs!
Flexibility equals superior performance!	The ultimate in chip resistance, durability and longevity	A finish that will keep looking good long after the vehicle leaves the shop!
Color Primer surfacer and wet-on-wet Sealer in one system	Primer Surfacer that converts to an exceptional wet-on-wet sealer	Reduce inventory costs while achieving the ultimate in performance!
Fast dry to sand time	45 minutes air dry to sand	No need to IRT for improved cycle times and productivity!
Wet-on-Wet Sealer Application	Reduce application time and improve overall productivity	Maximum productivity means more cars through the booth per shift!

If you’re ready to step up to the best in Profit, Performance and Productivity...
