6249

**Plastic Adhesion
Promoter-Clear
(non-VOC restricted areas)**

- Use as-is (packaged ready to spray)
- or
- Mix Tec/BASE® Basecoat / TS299 Tec/HIDE™ directly into 6249
- or
- Mix TP520 color directly into 6249

Two new adhesion promoters that go beyond the normal call of duty:

You now have the ability to spray tinted adhesion promoter directly to bare plastic!

This practice allows you to skip the sealer step, which saves time and money:

WANT MORE HOURS IN THE DAY?

Mixing Sealer	=	3 minutes saved
Applying Sealer	=	1 minute saved
Gun Cleaning	=	3 minutes saved
Sealer Recoat Time	=	15 minutes saved

22 minutes saved per repair!

Studies show that 1 out of 7 repair orders involve a new, raw plastic bumper cover. 22 minutes saved on 175 repairs

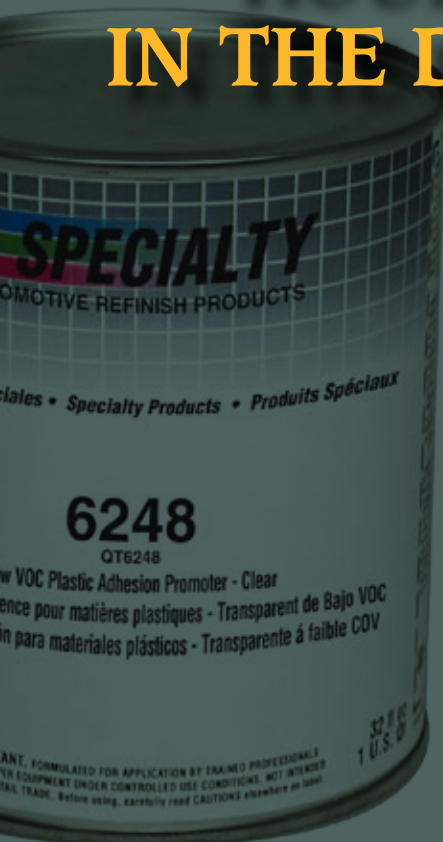

= 64.2 hours saved per year!

How will this change your business?

64.2 hours saved per year

= 40 additional repair orders per year!

This is an **\$80,000 sales opportunity** for the shop!

*All of the above data is based on Collision Center National Averages with Gross Annual Sales of \$2.5 Million, 1250 repair orders per year, an average severity of \$2000 per RO, and 250 workdays per year.
