EXTREME SPEED CLEARCOAT

The competition can't touch the new TC732 Extreme Speed Clearcoat from The Martin Senour Company. TC732 delivers industry-leading performance in air dry and baking scenarios. Bake TC732 for 5 -10 minutes at 140°F surface temperature, and reassemble the vehicle in 15 minutes! Just two coats, Wet On Wet, NO FLASH TIME between coats, out of dust in 20 minutes air-dry, Global GM Approval, Lifetime Guarantee...

How can TC732 change your business?

How can we deliver one more car per day?

- If an 8 hour day produces 5 cars, then 8 divided by 5 equals 1.6 hours per car.
- By saving up to 19 minutes of booth time per repair order, on an average of 5 repair orders per day, you now have the opportunity to capitalize on 1.6 hours saved per day, or 8 hours saved per week!

In addition to amazing sales growth potential, think of the electrical and gas savings! Decreasing the booth time by 50%, or 19 minutes per repair order, multiplied by the national average of 1250 Repair Orders per year, equates to an annual reduction of booth time by 396 hours! When we consider today's rising oil / gas prices, cutting booth times in half will decrease operating expenses, and increase profits.

-With today's average Repair Order at \$2,000.00, delivering one extra car per day could generate an additional \$500,000.00 in sales per year!
