

A-Plus™ University

EcoLEAN™ LEVEL 1

Sherwin-Williams Automotive Finishes is proud to offer our exclusive EcoLean™ collision services and training.

EcoLean™ is all about helping collision facilities drive **Productivity** and **Profitability**, while reducing the environmental impact on our **Planet**.

This program combines two of the most powerful forces in today's collision repair market:

- **Lean** Production
- **Green** Business Solutions – Waste Reduction

These training courses are designed to help collision facilities take advantage of these two powerful disciplines, and combine them into a sustainable program to drive profitability through the reduction of waste.

Once collision facilities are armed with these principles and simple tools, they will be able to change the way their companies operate!

The EcoLean™ Level 1 workshop has been developed especially for collision facility owners and managers who are interested in leveraging the power of lean production, as well as business solutions that help reduce environmental waste. These courses have been built by collision industry experts, and will afford the opportunity to relax in the company of industry peers, as well as learn from one another over a two-day period. **A full breakfast and lunch will be provided each day with a group dinner scheduled for the first evening.**

EcoLean™ Level 1 Overview

WHO SHOULD ATTEND? This workshop is designed for the top collision facility operators in the industry. It is geared toward collision facility owners and managers.

COURSE OBJECTIVE To provide the participant with the skills, knowledge, and tools necessary to improve their collision facilities' quality, production output, and profitability. Participants will be provided with tangible tools to drive waste out of their business, both process waste and environmental waste.

COURSE LENGTH 2 days / Hands-on Workshop Format

CLASS SIZE 30 attendees maximum

TOPICS COVERED

- The principles of reducing environmental waste
- The history of lean production, and its practical application in collision repair
- Methods of making the collision facility more efficient and consistent
- How to build a lean culture from the ground up

COST \$800.00 per attendee

A-Plus™ Network members: Loyalty Rewards Points may be used for this training.

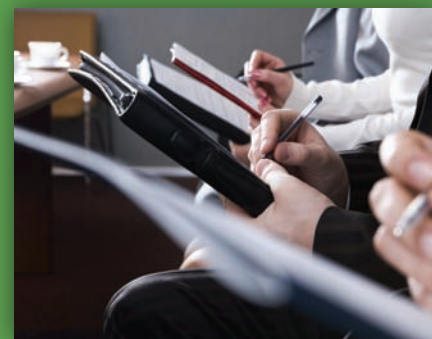

INTRODUCTION TO ECOLEAN™ Sherwin-Williams Manager of Regulatory Affairs will cover the use of green business solutions to help collision facilities reduce their carbon footprint by driving out environmental waste.

IMPROVING WORKSHOP EFFICIENCY Sherwin-Williams Manager of Business Consulting focuses this course on the theory and mechanics of lean production. He will help participants to understand and implement process improvement. The course covers methods to utilize people, space, and equipment for the maximum bottom line impact. This in-depth course will help collision facilities to reduce variation and to identify and fix the root causes of production problems.

PRINCIPLES OF 5S Sherwin-Williams Manager of Collision Repair Design Services will cover the importance of eliminating clutter inside a collision facility, and how to leverage the power of a clean, disciplined environment to deliver superior quality and consistency.

BUILDING A LEAN CULTURE Our instructor is the President of one of the industry's premier peer group services. She will discuss how to build a lean culture inside a collision facility from the ground up. She has many years of experience in human resources, and has worked with some of the top lean collision facilities throughout the US and Canada.
